PERGAMON

Applied Radiation and Isotopes 55 (2001) XV–XXVIII

Applied Radiation and Isotopes

www.elsevier.com/locate/apradiso

SUBJECT INDEX VOLUME 54

Absorption
Behaviour of Cs and Sr on Jih-Hsing bentonite 209
Of ^{65}Zn on calcareous soil 371
Self: effect on in situ mass diffusion measurements 35
Activation analysis
INAA: use to characterise ophiolites from N. Havana petroleum fields 183
Neutron: use for elemental analysis of Egyptian iron ore and industrial samples 559
Neutron: use to study heavy metal pollution of Danube Delta lacustrine sediments 853
PGNAA
Application to borehole logging for coal 335
For bulk coal samples in a 4π-geometry 519
Use for contraband detection in bulk samples 967
Use to determine soil contamination profiles (Corrected version of JARI 50 (1999) 415) 565
Air
Kerma: seasonal variation in Vulcano Porto area (Aeolian Is., Italy) 701
Surface, and atmospheric interactions with Be-isotopes 345
Albedo analysis
γ-ray of mineral raw materials: effect of heterogeneity 509
Alpha particle
Gross activity in airborne particulate samples: analysis and prediction models 645
Alumina
Sorption/desorption of europium: effects of pH, ionic strength and fulvic acid 603
Aluminium
α-Al_2O_3:C : use for personal dosimetry for mixed radiation fields 675
Determination in coal by PGNAA 519
Effect on electrodeposition yield of Th and U in soil and sediment analylses 29
Amang
Processing: radiological and environmental impact 393*
Americium
^{241}Am disintegration process: comparison of measured and calculated emission probabilities of K and L X-rays 785
Preparation of thicker targets by molecular plating 741
Amino acid
Labelled with radioselenium produced by the ^{nat}Br(p,x) ^{73,75}Se process 905
Ammonium bromide
NH_4 ^{82}Br: use as radiotracer to determine effect of flow rate on sludge hygienization 1
Angioplasty-balloon-catheter
^{32}P hot wall: calibration by LS spectrometry based destructive analysis 611
Animals
Application of multitracer techniques 195
Rat: transfer coefficient of U from food to organs 947

*Indicates a Technical Note

PII: S0969-8043(01)00115-4

Antibody
Monoclonal: labelling with ^{188}Re for radioimmunotherapy of tumours 399
Arsenic
^{66,67}As production by heavy ion activation of cobalt foil 189
Pollution in groundwater aquifiers: measurement by XRF 737
Ash
Coal: determination by PGNAA 519
Astatine
^{211}At: optimisation of cyclotron production parameters for the ^{209}Bi(α,2n)^{211}At reaction 839
Atmosphere
Interactions at northern high latitudes with Be isotopes in surface air 345
Attenuation coefficient
Of soils and building materials in energy range 276–1332 keV 973*

Beam
Sweep technique: use in production of ^{18}F from a water target 753
Bentonite
Jih-Hsing: sorption and diffusion behaviour of Cs and Sr 209
Sorption/desorption of europium: effects of pH, ionic strength and fulvic acid 603
Beryllium
Isotopes in surface air at northern latitudes: atmospheric interactions 345
Beta activity
Gross of airborne particulate samples: analysis of prediction models 645
Bone
In vivo lead measurement: study of combined K and L XRF methods 893
In vivo lead measurement: use of doublet deconvolution to improve reliability in spectra analysis 691
Lead measurements: coherent normalisation in calibration procedure for XRF 319
Pain palliation with [^{188}Re]ReABP: labelling process 435
Radiation absorbed dose due to ^{153}Sm-EDTMP and $^{89}SrCl_2$: measurement by ESR 269
Borehole
Drilling: solutions of the neutron transport equation and correct use of diffusion approximation 845
Geometry: comparison of theoretical solutions of 3-layer coaxial diffusion approximation with experimental data 849
Logging for coal: application of in situ PGNAA 335
Brain
Imaging: synthesis and biodistribution of new ^{99m}Tc-nitrido complexes 745
Radiosynthesis of [^{123}I]βCIT as ligand for study of dopaminergic and serotinergic systems 93
Bremsstrahlung
In X-ray tube spectra: enhancing the ratio of fluorescence 59
Brick
Clay used in Sri Lanka: natural radioactivity and gamma dose 365
Bromine
^{nat}Br(p,x) ^{73,75}Se process: excitation functions and ^{75}Se yield 905
[^{18}F] Bromofluoromethane
Automated synthesis and purification 927

Cadmium
Extraction from perchloric and phosphoric media with HDEHP 921
Calcium
$CaSO_4$: Dy pellets response as dosimeter for β-radiation and low energy photon fields 957
Determination in rice saplings by X-ray spectrometry: matrix effects 377

Californium
^{252}Cf in neutron radiography system: moderator-collimator-shielding design 217
^{252}Cf neutron source for PGNAA of bulk coal samples 519
Cancer
Breast imaging: synthesis and evaluation of E[^{125}I]IVDE and Z[^{125}I]IVDE 227
Carbon dioxide
^{11}C labelled: study of reduction with lithium aluminium hydride to produce ^{11}C labelled formaldehyde and formic acid 935*
Carbonate
ESR signal at $g=2.0057$: analytical model 995
Cell
Cervical carcinoma in mice: uptake of ^{188}Re(V)-DMSA; pharmokinetics and dosimetry 413
Cement
Pakistani Portland: natural γ-emmitting radionuclide content 861
Raw mill feed: on belt elemental analyses 11
Cerium
^{139}Ce disintegration process: comparison of measured and calculated emission probabilities of K and L X-rays 785
Cesium
Sorption and diffusion behaviour on Jih-Hsing bentonite 209
Chelating agent
EDDS: use as a biodegradable radiochemical decontaminant 587
Chelidonine
[^{18}F] labelled: synthesis for possible use as an antitumour agent 407
Chemical speciation
Use to evaluate EDDS as a biodegradable radiochemical decontaminant 587
CIEMAT/NIST
Use to compute counting efficiency in LSC 447
Cluster analysis
Use to determine radionuclide concentrations in beach sand 535
Coal
Borehole logging: application of in situ PGNAA 335
Bulk samples: application of PGNAA in a 4π geometry 519
Cobalt
^{57}Co XRF measurement of bone lead: coherent normalisation in calibration procedure 319
Coincidence summing correction
For natural decay systems in γ-ray spectrometry 769
Collagen
Natural and tanned: EPR investigation after γ-ray irradiation 887
Collimator
Design for neutron radiography system using ^{252}Cf 217
Geometry: effect on in situ mass diffusion measurements 35
Complex
Bis(N-isobutyl-dithiocarbamato)nitrido ^{99m}Tc complex: synthesis and biodistribution 745
Labile 3+1 ^{99m}Tc ligand exchange with SH group containing proteins 637
^{99m}Tc-HMPAO: stability enhancement by addition of methylene blue 633
Compton scattering
Use for densitometry 801
Concrete
Determination of ^{222}Rn emanation fraction and diffusion coefficient using an accumulation chamber 467

Copper
$^{63}Cu(p,n)^{63}Zn$, $^{63}Cu(p,2n)^{62}Zn$ and $^{65}Cu(p,n)^{65}Zn$ reactions: excitation functions 147
Counting
Full spectrum DPM liquid scintillation: measurement of ^{89}Sr and ^{90}Sr in aqueous samples 279
Liquid scintillation: free parameter, figure of merit and ionisation quench effects 447
Liquid scintillation-gel suspension method: use for simultaneous determination of ^{226}Ra and ^{210}Pb in groundwater and soil 275
4π(EC-X) γ-coincidence: use to standardise ^{169}Yb and half-life determination 483
Cross sections
Differential of (n,p) (n,α) and (n,2n) reactions of isotopes of zirconium in 10–12 Mev neutron energy range 655
Cyclotron
Production parameters for ^{211}At and ^{210}At optimization 839
Production of ^{67}Ga (III) from a tandem ^{nat}Ge–^{nat}Zn target 915

Dating
Luminescence of quartz and feldspar 175
Decay
Natural series : coincidence summing corrections in γ-ray spectrometry 769
Of ^{72}Ga 241
Of ^{42}K transitions: measurement of γ-ray probability 443
Deep ultraviolet photoresist
Characterisation and modelling of metal diffusion 811
Density
Variation with depth: use of Compton scattering 801
Detector
HPGe: photopeak efficiency calculations including self-absorption and coincidence corrections for Marinelli beaker sources 761
Nuclear track: use to study radon and thoron release from building materials 291
Deuteron
Induced reactions on ^{186}W to produce ^{186}Re 89
Diffusion
Approximation for rocks and asymptotic solutions of neutron transport equation 845
Approximation of boreholes : comparison of theoretical solutions with experimental data 849
Behaviour of Cs and Sron Jih-Hsing bentonite 209
Coefficient measurements on in situ masses: effect of collimator geometry and self-absorption 35
Coefficient of ^{222}Rn in concrete 467
Metal, from deep ultraviolet photoresist and silicon substrate and out-diffusion clearing model 811
Dose
Calibrator settings for ^{18}F: experimental evaluation 113
Distribution at extreme irradiation depths of γ-knife surgery: EGS4 Monte Carlo calculations 461
Effective rate to residents in vicinity of an amang processing plant 393*
Estimation for repeated ^{32}P ingestion in humans 123
Estimates to the public from ^{210}Po ingestion via dietary sources at Kalpakkam (India) 663
Reconstruction of individual absorption by tooth enamel 833
Dosimeter
Thermoluminescent: use to determine seasonal variation of air kerma in the Vulcano Porto region (Aeolian Is., Italy) 701
Dosimetry
β-radiation and low energy photon: TL response study of $CaSO_4$: Dy pellets 957
EPR dose response of tooth enamel: dependence on sample preparation procedure 793

ESR of tooth enamel: effects of UV irradiation 131
ESR of ^{89}Sr and ^{153}Sm in bone 269
Gamma ray
Application of TiO_2 sols 475
Calculations for clay bricks used in Sri Lanka 365
Luminescence of quartz and feldspar 175
Personal system: use of α-Al_2O_3:C for mixed radiation fields 675
Of ^{188}Re(V)-DMSA in cervical carcinoma cells in mice 413
Terrestial γ-radiation dose rate in Johore: geological influence 327

Electrodeposition
Low yields of Th and U in soil and sediment analyses: investigation 29
Use to prepare thicker Am targets 741
Element
$34 \leqslant Z \leqslant 53$: total L-shell X-ray production cross sections by 400–700 keV protons 455
On-belt analysis for cement raw mill feed 11
EPR
Investigation of γ-ray irradiated natural and tanned collagen 887
Sensitivity of tooth enamel: dependence on method of sample preparation 793
Spectra of tooth enamel and reconstruction of absorbed dose 833
ESR
Dosimetry of ^{89}Sr and ^{153}Sm in bone 269
Dosimetry of tooth enamel: effects of UV irradiation 131
Signal at $g = 2.0057$ in carbonate (coral): analytical model for SO_2^- centre 995
Environment
Radioactive pollution: multivariate model 355
Radioactivity in air kerma in the Vulcano Porto area (Aeolian Is., Italy) 701
Estrogen
Radioiodinated: synthesis and evaluation for breast tumour imaging 227
[S,S']-Ethylenediamine disuccinic acid (EDDS)
Chemical speciation for assessment as a biodegradable radionuclide decontaminant 587
Europium
Sorption/desorption on alumina, bentonite and red earth: effects of pH, ionic strength, fulvic acid and iron oxide 603
Excitation functions
Calculations for $^{63}Cu(p,n)^{63}Zn$; $^{63}Cu(p,2n)^{62}Zn$ and $^{65}Cu(p,n)^{65}Zn$ reactions 147
Calculations for nuclides produced in proton induced reactions on ^{nat}Si 101
Calculations for proton induced reactions in ^{66}Zn,^{67}Zn and ^{68}Zn 311
For the $^{nat}Br(p,x)^{73,75}Se$ process 905
Use to deduce cross sections of (n,p) (n,α) and (n,2n) reactions of zirconium isotopes produced by neutron bombardment 655

Feldspar
Alkali: photo-ionization of radiation induced traps 175
Figure-of-merit
Usefulness in computing counting efficiency in LSC 447
Fluorescence
Improvement of ratio to bremsstrahlung in X-ray tubes 59
Fluorine
^{18}F: experimental evaluation of dose calibrator settings 113
^{18}F production using a water target with a beam sweep 753

[^{18}F]-EF5 {[^{18}F]-2(2-nitro-1(H)imidazol-1-yl)–(2,2,3,3,pentafluoropropyl)acetamide}
Production and use as a marker for PET detection of hypoxia 73
Flow rate
Effect on sludge hygienization: study by radiotracer 1
Food
^{210}Po ingestion *via* dietary sources at Kalpakkam (India): dose estimation 663
Uranium content: transfer coefficient to organs of rats 947
[^{11}C]-Formaldehyde
Production by low temperature reduction and formation of [^{11}C] formic acid 935*
[^{11}C]Formic acid
Formation on low temperature reduction of $^{11}CO_2$ with lithium aluminium hydride 935*
Free radical
Production in irradiated natural and tanned collagen: EPR investigation 887
Fulvic acid
Effects on sorption/ desorption of europium on alumina, bentonite and red earth 603
Gadolinium
^{159}Gd: emission probabilities of γ-rays 695
Gallium
^{66,67}Ga production by heavy ion activation of cobalt foil 189
^{67}Ga (III) production from ^{nat}Ge-^{nat}Zn target 915
^{72}Ga: β-decay 245
Gamma ray
Airborne spectrometric data: evaluation for the Missikat uranium deposit (Egypt) 497
Albedo analysis of mineral raw materials: effect of heterogeneity 509
Dose from Sri Lankan clay bricks 365
Emission probabilities of ^{159}Gd 695
Emission probabilities of ^{169}Yb 483
Intensity distribution of subsoil in the Oriental region of Paraguay 527
Knife surgery: dose distributions at extreme radiation depths 461
Neutron induced γ-photon intensities: use to determine soil contamination (corrected version of JARI 50 (1999) 415) 565
Probability per decay of ^{42}K 443
Radiation dosimetry: application of TiO_2 sols 475
Radiation effects on potassium pertechnetate in carbonate media 45
Sensitivity of trehalose dihydrate lyoluminescence 387
Terrestial radiation dose rate (TGRD) in Johore: geological influence 327
Well logging and spectrometric signatures of Al-Abter phosphatic deposits in Syria 543
Gel
Suspension for liquid scintillation counting of ^{226}Ra and ^{210}Pb in groundwater and soil samples 275
Geology
Influence in terrestial γ-radiation dose rate in Johore 327
Germanium
^{nat}Ge-^{nat}Zn tandem target: use for production of ^{67}Ga (III) 915
^{72}Ge: γ-ray spectrum following β-decay of ^{72}Ga 241
Glucose
Effect on transport of ^{125}I across an anion exchange paper membrane 595
Granite
Cornish: transfer of ^{234}U and ^{238}U during water-rock interaction 977
Half life
Of ^{169}Yb 483

HDEHP
Use to extract Cd and iodocadmat from perchloric and phosphoric media 921
Hypoxia
PET detection: synthesis and use of [^{18}F]-EF5 73
Tumour: use of ^{99m}Tc-cyclam AK2123 as a marker 81
Ilmenite
Processing: radiological and environmental impact 393*
Impurity
Diffusion and removal from deep ultraviolet photoresist and silicon based substrate 811
Iodine
^{123}I and ^{124}I production from purified Te dioxide 383*
^{125}I transport across an ion exchange paper membrane: influence of glucose and urea 595
^{131}I activity measurements: intercomparison in Brazilian nuclear medicine services 489
[^{123}I]βCIT
Radiosynthesis for human brain studies 93
m-Iodobenzylguanidine [^{131}I]mIBG
^{123}I and ^{124}I labelled: batch preparation with high specific activity 711
^{131}I labelled: stabilization at room temperature in ethylacetate/chloroform 241
Iodocadmat species
Extraction with HDEHP from perchloric and phosphoric media 921
Iodogen
Self-radio-iodination 749
Ion
-Atom collisions: X-ray production cross sections 455
Heavy: activation of Co foil to produce ^{66,67}Ga and ^{66,67}As 189
Heavy: reactions to produce ^{152}Tb 53
Ion exchange
Paper membrane: effect of glucose and urea on ^{125}I transport 595
Separation of ^{67}Ga from tandem ^{nat}Ge–^{nat}Zn target 915
Use to separate ^{66,67}Ga from an irradiated Co foil 189
Ionization quench
In liquid scintillation counting 447
Iridium
^{192}Ir solution: disintegration rate measurements 141
Iron
Determination in coal by PGNAA 519
Egyptian ore and industrial samples: elemental analysis by NAA 559
Laser evaporated atoms: Mössbauer study of reaction with nitrogen molecules 21
Oxides in red earth: effect on sorption/desorption of europium 603
Irradiator
For sludge hygienization: radiotracer studies of the effect of flow rate 1
UV: effect on ESR dosimetry of tooth enamel 131

Lead
In bone: coherent normalisation in calibration procedure for XRF measurement 319
In vivo estimation: use of doublet deconvolution to improve reliability in spectra analysis 691
In vivo measurements in bone: use of combined K and L XRF methods 893
^{210}Pb: simultaneous determination with ^{226}Ra in groundwater and soil samples 275
Ligand
Mixed 3 + 1 complex with ^{99m}Tc: use of *N*,*N*-bis 2-(mercaptoethyl)-*N*′,*N*′-diethylenediamine and 1-octanethiol 429

Limestone
Quaternary deposits from Brazil: U and Th series disequilibrium 153
Lipophilicity
Of radiotracers: effect of impurities on measurements by counting techniques 203
Log P
Measurements for lipophilic substances: effect of impurities 203
Lung
Dosimetry: calculations for radon progeny 961
Lutetium
^{177}Lu standardization by $4\pi\beta$ LS spectrometry with ^{3}H standard efficiency tracing 623
Lyoluminescence
Characteristics of trehalose dihydrate 387

Marinelli beaker
Sources: HPGe detector photopeak efficiency calculation, coincidence correction factors and self-absorption corrections 761
Materials
Building (Algerian): natural radioactivity 687
Building (Bangladesh) attenuation coefficients in the energy range 276–1332 keV 973*
Building: study of radon and thoron emanation using polymeric nuclear track detectors 291
Mineral: effect of homogeneity in γ-ray albedo analysis 509
N,N-bis(2-Mercaptoethyl)-N′,N′-diethylenediamine
Complex with ^{99m}Tc 429
Mercury
^{203}Hg disintegration process: comparison of measured and calculated emission probabilities of K and X-rays 785
Metal
Contamination on silicon based substrates 811
Heavy: use to study pollution of Danube Delta lacustrine sediments 853
[^{125}I](E)-3-Methoxy-17α-iodovinylestra-1,3,5(10),6-tetraen-17β-ol (E)[^{125}I]IVDE
Synthesis and biological evaluation 227
[^{125}I](Z)-3-Methoxy-17α-iodovinylestra-1,3,5(10),6-tetraen-17β-ol (Z[^{125}I]IVDE)
Synthesis and biological evaluation 237
Methylene blue
Use to enhance the stability of (^{99m}Tc) HMPAO 633
Microsphere
^{186}Re and ^{188}Re labelled: stability after neutron activation 869
Moderator
Design for a neutron radiography system using ^{252}Cf 217
Monte Carlo
Code Geant3 and Sch2for: use in calculations of coincidence summing corrections in γ-ray spectrometry 769
EGS4 calculations of dose distributions at extreme depths of γ-knife surgery 461
Mössbauer
Study of the reaction of laser evaporated iron atoms with nitrogen molecules in low temperature argon matrices 21

Neutron
10–12 MeV: differential cross sections for the (n,p) (n,α) and (n,2n) reactions of zirconium isotopes 655
14.5 MeV: systematics for cross sections of reactions (n,p); (n,α) and (n,2n) 283
Radiography system using ^{252}Cf: moderator-collimator-shielding design 217

Spectra modified by iron slabs: measurements and calculations 307
Transport equation solution and use of diffusion approximation for rocks 845
Nitrogen
Molecules: Mössbauer study of reaction with laser evaporated iron atoms in a low temperature argon matrix 21
Nuclear medicine
Brazilian services: intercomparison of ^{131}I and ^{99m}Tc activity measurements 489
Nuclear quadrupole interactions
Of decaying atoms of ^{75}Se in different environments: study by sum peak method 261

1-Octanethiol
Use as a coligand with ^{99m}Tc to give a 3+1 mixed ligand 429
Ophiolites
From N. Havana petroleum fields: characterization using INAA 183
Optically stimulated luminescence
Use of α-Al_2O_3:C as a personal dosimeter 675

Particle
Airborne sample: gross α and β activities: analysis and prediction models 645
Pellet
$CaSO_4$:Dy response as dosimeter for β-radiation and low energy photon fields 957
Mixed ThO_2–UO_2: estimation of U/Th by γ-ray spectrometry 941
Peltier thermal cycling unit
Use in radiopharmaceutical synthesis 97
PET
Detection of hypoxia: synthesis and use of [^{18}F] EF5 73
Phosphate
Rock from Al-Abter region in Syria: γ-ray well logging and spectrometric signature 543
Phosphorus
^{32}P: dose estimation for repeated ingestion in humans 123
^{32}P 'hot wall' angioplasty-balloon-catheter sources: destructive analysis procedure 611
^{32}P in radioisotope studies of root activity and root level interactions in tree based systems: review 715
Photoionization
Of radiation induced traps in quartz and feldspar 175
Photon
Emission probabilities of ^{169}Yb 483
Plant
Application of multitracer techniques 195
Rice saplings: matrix effects during K and Ca determination by X-ray spectrometry 377
Tree based systems: review of radioisotope studies of root activity and root level interactions 715
Polonium
^{210}Po ingestion via dietary sources at Kalpakkam (India): dose estimates 663
Polymer(poly-lactic acid)
Biodegradable microspheres with ^{186}Re and ^{188}Re: stability after neutron activation 869
Potassium
Determination in rice saplings by X-ray spectrometry: matrix effects 377
Pertechnetate: γ-radiation effects in carbonate media 45
^{42}K decay: measurement of γ-ray probability 443
^{40}K in Algerian building materials 687
^{40}K in clay bricks from Sri Lanka: natural radioactivity and γ-dose 365

Program
EMISSION: use for calculation of emission probabilities of K and L X-rays for radioactive disintegration processes 785
JESS: use for chemical speciation assessment of EDDS for radiochemical decontamination 587
Protein
SH group containing: ligand exchange with labile 3+1 ^{99m}Tc(V) complexes 637
Proton
Induced reactions on ^{Nat}Si: calculation of excitation functions of nuclides produced 101
Induced reactions on ^{66}Zn, ^{67}Zn and ^{68}Zn: excitation functions 311
Proton induced X-ray emission (PIXE)
For elements $34 \leqslant Z \leqslant 53$ 455

Quantitative structure–activity relationship m(QSAR)
Influence of lipophilicity measurements 203
Quartz
Photoionization of radiation induced traps 175

Radiation
Gamma: effects on potassium pertechnetate in carbonate media 45
Radioactive pollution
Multivariate discrete probability distributions 355
Radioactivity
Air kerma: seasonal variation in the Vulcano Porto area (Aeolian Is., Italy) 701
Natural in Algerian building materials 687
Natural in beach sand: cluster analysis of radionuclide concentration 535
Natural in clay bricks used in Sri Lanka 365
Radiography
Neutron system using ^{252}Cf: moderator-collimator-shielding design 217
Radio-iodination
Self: of iodogen 749
Radioisotope
Studies of root activity and root level interactions in tree based systems: review 715
Radionuclide
Concentration in beach sand by cluster analysis 535
Decontamination by EDDS: assessment by chemical speciation 587
γ-emitting content in Pakastani Portland cement 861
Natural decay series: coincidence summing correction in γ-ray spectrometry 769
Radiopharmaceutical
Synthesis: investigation of the use of a Peltier thermal cycling unit 97
Radiosurgery
γ-knife: EGS4 Monte Carlo calculations of dose distribution at extreme depths 461
Radiotherapy
Intracoronary: automated synthesis of ^{188}Re-MAG$_3$ 419
Radiotracer
NH_4 ^{82}Br: use to determine the effect of flow rate in a sludge hygienization irradiator 1
Lipophilicity measurements using counting techniques: effect of impurities 203
Multitracer techniques in chemical and life sciences: review 195
Use to investigate out-diffusion of transition metals from deep ultraviolet photoresist into underlying substrate 811
Radium
^{226}Ra: determination with ^{210}Pb in groundwater and soil using LSC-gel suspension method 275

^{226}Ra in Algerian building materials 687
^{226}Ra in Sri Lankan clay brick material: reactivity and γ-dose 365
Radon
Determination of emanation fraction and diffusion in concrete 467
Emanation from building materials: use of a polymeric nuclear track detector 291
Progeny: measurement of unattached fraction and activity median diameter 961
Red earth
Europium sorption/desorption: effects of pH, ionic strength, fulvic acid and iron oxides 603
Rhenium
Re-ABP labelling with^{188}Re for bone pain palliation 435
^{186}Re, no carrier added: production *via* deuteron induced reactions on ^{186}W 89
^{186}Re and ^{188}Re biodegradable microspheres: stability after neutron activation 869
^{188}Re(V)-DMSA complex: uptake by cervical carcinoma cells in mice, pharmokinetics and dosimetry 413
^{188}Re labelling of monoclonal antibodies for immunotherapy of tumours: characteristics, quality control and in vitro studies 399
^{188}Re-MAG_3 synthesis and use for intracoronary radiation therapy 419
Rubber
Multielement analysis by XRF spectrometry 881

Samarium
^{153}Sm: ESR dosimetrry in bone 269
Sample
Airborne particulate: gross α and β activities analysis and prediction models 645
Bulk: corrections for self attenuation in γ-ray spectrometry 777
Bulk: investigation of PGNAA method and improvements 967
Sand
Radionuclide concentrations: determination by cluster analysis 535
Scintillator
Performance: role of activator 821
Sediment
Analysis by electrodeposition: low yields of Th and U 29
Danube Delta lacustrine: study of heavy metal pollution by NAA 853
Selenium
Production by ^{nat}Br(p,x) ^{73,75}Se for amino acid labelling 905
^{75}Se decaying atoms: study of nuclear quadrapole interactions by the sum peak method 261
Self attenuation factor corrections
In γ-ray spectrometry of bulk samples 777
Shielding
Design for a neutron radiography system using ^{252}Cf 217
Silicon
Based substrate: metal diffusion from DUV photoresist characterization and modelling 811
Determination in coal by PGNAA 519
^{Nat}Si: calculation of excitation functions of nuclides produced in proton induced reactions 101
Sludge
Hygienization by irradiation: radioisotope tracer study to determine the effect of flow rate 1
Soil
Analysis: low Th and U yields in the electrodeposition process 29
Bangladesh: attenuation coefficients in the energy range 276–1332 keV 973*
Calcareous: sorption characteristics of Zn 371

Contamination profiles from intensities of capture γ-rays using above surface neutron sources (Corrected version of JARI 50 (1999) 415) 565
Simultaneous determination of ^{226}Ra and ^{210}Pb using LSC-suspension gel technique 275
Sub soil γ-ray intensity in Oriental region of Paraguay 527
Sorption/desorption
Of radioeuropium on alumina, bentonite and red earth: comparative study and effects of pH, ionic strength, fulvic acid and iron oxides 603
Spectra
EPR: reconstruction of individual absorbed dose by tooth enamel 833
Of neutrons modified by iron slabs: measurements and calculations 307
Unfolding method: use for simultaneous measurement of ^{89}Sr and ^{90}Sr by LSC 299
XRF: use for in vivo lead estimation by doublet deconvolution 691
X-ray tube: enhancing the ratio of fluorescence to bremsstrahlung 59
Spectrometry
Airborne γ-ray: evaluation of data for the Missikat uranium deposit (Egypt) 497
$4\pi\beta$-LS: use for standardization of ^{177}Lu 623
γ and α: use to determine U in phosphatic deposits in the Al:-Abter region in Syria 543
γ-ray
Coincidence summing corrections for natural decay series 769
Of bulk samples: self attenuation corrections 777
Use for quantitative estimation of U/Th in mixed ThO_2–UO_2fuel pellets 941
Use in determining a multivariate model for radioactive contamination 355
Liquid scintillation: use in determination of ^{32}P in 'hot wall' angioplasty-balloon-catheters 611
XRF: application to multielement analysis of rubber 881
X-ray of K and Ca in rice saplings: matrix effects 377
Strontium
Sorption and diffusion behaviour on Jih-Hsing bentonite 209
^{89}Sr: ESR dosimetry in bone 269
^{89}Sr and ^{90}Sr: simultaneous measurement by LSC using spectrum unfolding method 299
SO_2^- radical
Analytical model based on ESR signal at $g = 2.0057$ 995
Sum peak method
Use to study nuclear quadrapole reactions of ^{75}Se in different environments 261
Systematics
For neutron cross sections: statistical model 283
Target
^{nat}Ge–^{nat}Zn: use for cyclotron production of ^{67}Ga 915
Thicker ^{241,243}Am: preparation by electrodeposition 741
With beam sweep for ^{18}F production 753
Technetium
3 + 1 mixed ligand ^{99m}Tc complex: synthesis, characterization and biological evaluation 429
3 + 1 ^{99m}Tc(V) complexes: ligand exchange reaction with SH group containing proteins 637
^{99m}Tc activity measurements: intercomparison in Brazilian nuclear medicine services 489
^{99m}Tc bis(N-isobutyldithiocarbamato) nitrido complex: synthesis and biodistribution 745
^{99m}Tc-cyclam AK2123: use as a marker in tumour hypoxia 83
^{99m}Tc HMPAO complex: methylene blue enhanced stability 633
Tellurium
Dioxide: purification for re-use in iodine radioisotope production 383*
Terbium
Activator of scintillator in X-ray imaging: effect on performance 821
^{152}Tb production by heavy ion reactions and proton induced spallation 53

Thermoluminescence
Response study of $CaSO_4$: Dy pellets in β-radiation and low energy photon fields 957
Thorium
Low electrodeposition yields in soil and sediment analysis 29
Quantitative estimation in ThO_2–UO_2fuel pellets by γ-ray spectrometry 941
Series disequilibrium in Brazilian quaternary carbonate deposits 153
^{232}Th in Algerian building materials 687
^{232}Th in Sri Lankan clay bricks: natural radioactivity and γ-dose 365
Thoron
Release from building materials using a nuclear track detector 291
Titanium
Dioxide sols: use for γ-ray radiation dosimetry 475
Tooth enamel
Dependencies of radiation sensitivity in EPR dosimetry 793
Effects of UV irradiation on ESR dosimetry 131
Individual absorbed dose reconstruction on base of non-linear simulation of their EPR spectra 833
Track
Detector: use to study radon and thoron release from Egyptian building materials 291
Trehalose dihydrate
Lyoluminescence characteristics and γ-ray sensitivity 387
Tritium
^{3}H standard efficiency tracing: use in standardisation of ^{177}Lu 623
Tumour
Hypoxia: use of ^{99m}Tc-cyclam AK2123 as a marker 83
Immunotherapy: ^{188}Re labelling on monoclonal antibodies and in vitro stability studies 399
Synthesis of [^{18}F] labelled chelidonine as an anti-tumour agent 407
Tungsten
^{186}W deuteron induced reactions to produce ^{186}Re 89

Ultra violet
Irradiation: effects on ESR dosimetry of tooth enamel 131
Uranium
Estimation in ThO_2–UO_2fuel pellets by γ-ray spectrometry 941
In phosphatic deposits of AL-Abter region in Syria 543
Low electrodeposition yield in soil and sediment analysis 29
Missikat deposit (Egypt): evaluation of airborne γ-ray spectrometric data 497
Series disequilibrium in Brazilian quaternary carbonate deposits 153
Transfer coefficient measurements to organs of rats as a function of content in food 947
^{234}U and ^{238}U transfer during water–rock interactions in Cornish granite 977
Urea
Effect on transport of ^{125}I across an anion exchange paper membrane 595

Water
Content of concrete: effect on ^{222}Rn emantion fraction and diffusion coefficient 467
Ground (aquifiers): arsenic pollution measurement by XRF 737
Ground: simultaneous determination of ^{226}Ra and ^{210}Pb using LSC-gel suspension method 275
-Rock interaction in Cornish granite: ^{234}U and ^{238}U transfer 977
Target with beam sweep for ^{18}F production 753
Well logging
Natural γ-ray: of AL-Abter phosphatic deposits in Syria 543

X-ray
Imaging: role of activator in performance of scintillator 821
K and L: comparison of measured and calculated emission probabilities following radioactive disintegration processes 785
K and L based XRF: use to determine in vivo lead in bone 893
Production cross sections by 400–700 keV proton impact for elements $34 \leqslant Z \leqslant 53$ 455
Tube spectra: enhancing the ratio of fluorescence to bremsstrahlung 59
XRF: application to multielement analysis of rubber 881
XRF: use to determine As pollution in ground water aquifier 737
XRF measurement of lead in bone: coherent normalisation in calibration procedure 319

Yerbium
^{169}Yb absolute measurements of photon emission probabilities and half-life 483

Zinc
^{Nat}Ge–^{nat}Zn tandem target for ^{67}Ga production 915
^{65}Zn: sorption characteristics on calcareous soil 371
^{66}Zn, ^{67}Zn and ^{68}Zn: excitation functions for proton induced reactions 311

Zirconium
Isotopes: differential cross sections of (n,p) (n,α) and (n,2n) reactions in 10–12 MeV neutron energy range 655
